

Final energy demand inside and outside CE policy areas

Percentage change from matched no CE | 2050

Inside policy area      Outside policy area

M/H = medium/high CE; EU+ = EU + international partners. Zero = matched no CE.

EU: 3 inside / 25 outside; EU+: 17 inside / 11 outside model regions.

Final energy sums exact parent carriers, excluding nested fuel subcategories.

Draft assumption: missing additive activity = zero. Undefined percentages appear as gaps.
