European industrial GHG response: OMNIA-ENGAGE and GCAM

Reported industry totals | EU-only CE; source emissions scopes differ

OMNIA: reported industry GHG. GCAM: industry energy-demand + industrial-process Kyoto gases.

Emissions accounting and gas coverage are not harmonised; sector GHG is unavailable in GCAM.

EU-region boundaries differ slightly. Model years are retained; carbon capture is not subtracted again.

OMNIA missing activity = zero (provisional); GCAM missing values remain gaps.
