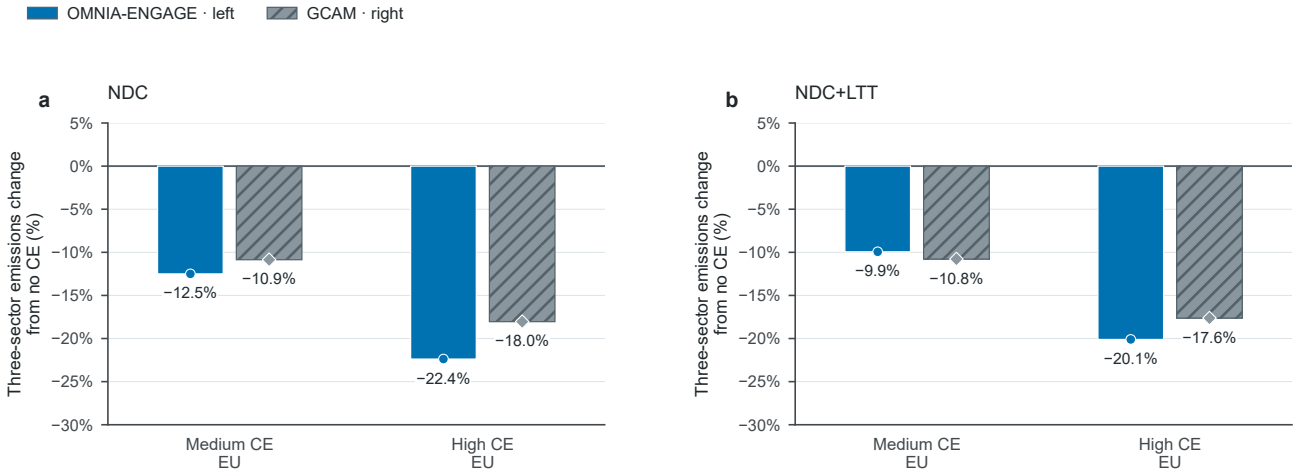
Circular economy effects on European material-sector emissions

EU-only CE in 2050 | cement + steel + aluminium | change from own no-CE case



Combined cement, steel and aluminium: OMNIA GHG; GCAM CO2. Gas and process boundaries differ.

GCAM: cement energy + processes; steel/aluminium energy CO2. Reference: own 2050 three-sector no CE.

NDC+LTT aluminium blanks in OMNIA = zero (provisional). Capture is not subtracted again.
