European final-energy mix: OMNIA-ENGAGE and GCAM

EU-only CE settings | historical references and 2050 final energy

Historical bars: OMNIA 2019 / GCAM 2021. All other bars: 2050; no interpolation.

Labels above: change from each model's 2050 no CE in the same pathway. M/H = medium/high CE.

GCAM unallocated energy = reported sector total minus supplied carrier parents (aluminium).

OMNIA: EUE + EUM + EUW; GCAM: EU-27 aggregate. Model geographic boundaries differ slightly.

OMNIA missing activity = zero (provisional); GCAM missing values remain gaps.
